Holds technical info

Our goal is to offer our customers, products of the highest quality. We are always looking for materials, shapes that can give new ideas of routesetting and gratifying climbers.

Material

Our climbing holds are made with the latest generation polyurethane resin Dannomond. This resin has been formulated exclusively for climbing holds production and guarantees an excellent resistance to impacts, dry feeling to the touch and duration over time. Each hold is subject to an accurate and certified quality control.

Fixing

The central fixing hole is protected by a dual bolt insert that allows the use of both cylindrical and flat head bolts. Antirotation holes have a metal insert inside.

Hollow Back

Large holds are characterized by an hollow back technology, with internal reinforcement ribs that allow extreme lightness and great flexural strength.

Antelope

This series of 10 mega PU holds is inspired by the wonder of the nature of Antelope Canyon, located in Arizona, in the Navaho's land.

Water has carved the rock in millions of years giving us sinuous and rounded shapes.

Red rock

Red Rock series are inspired by the amazing USA rock. This serie is composed by 45 holds with mixed prehensions! You can find edges, pinches, slopers which thanks to the texture very similar to the rock, are extremely interesting as prehensions. Never predictable.

PLW technical info

Wood:

PLW Kando volumes are made of high quality Plw birch wood of 18 mm. The cuts are made with CNC 5-axis machines, which guarantee precise cutting and perfect assembly. Volumes of the New Edge System series are made of 13 mm curved wood.

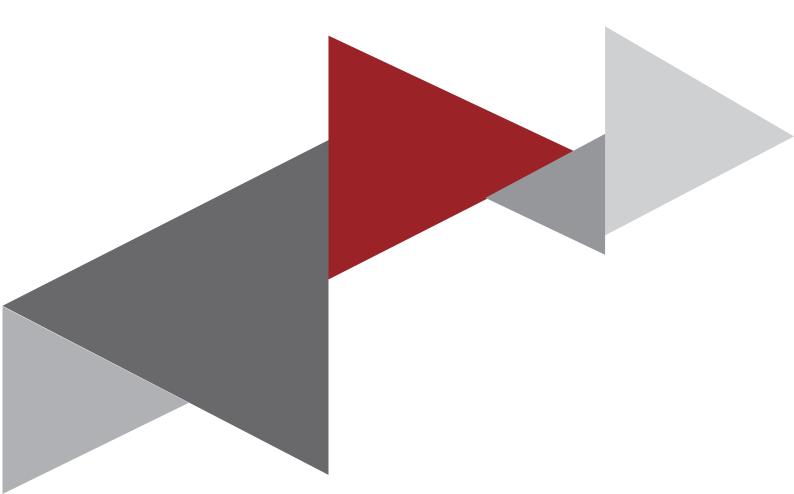

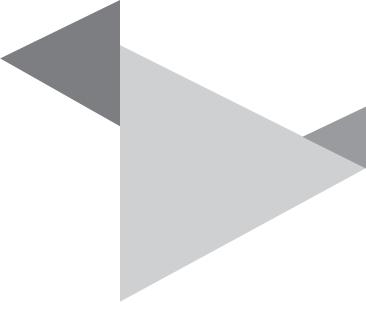

Fixing

All volumes can be fixed to the climbing wall with self-tapping screws. All fixing holes are protected by threaded bushings; this allows to protect the fixing hole and the wood, from the fixing action and consequently, lengthens the life of your Plw volumes.

Grip

Grip of our Plw volumes is characterized by a comfortable and satisfying touch grain! The use of combinations of quartz sand with controlled granulometry and PU-based resins, studied in collaboration with specialized companies in the sector, ensure a dry and a long-lasting effect.

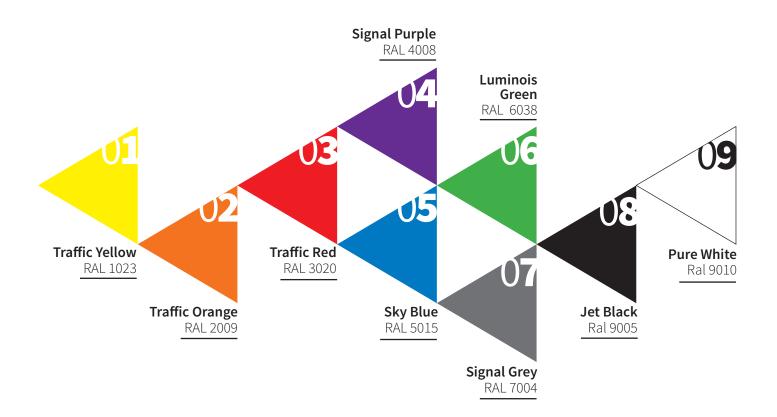

Colors Available

Kando plw volumes are available in classic colors and can be supplied in the colors requested by the customer, providing the reference Ral codes.

Our volumes are also available in three different finishing. Full Grip, Dual Tex Matte, Dual Tex Glossy.

New Edge System PLW volumes

PLW 1

Volumes half cilinder slopers edges. (In photo dual tex glossy finishing) These PLW volumes are produced with curved playwood.
