TECHNOLOGY

KARMA

Bug PU-N°6081

A collection of thin and slopy holds made with PU.
Ideal for practicing precision.

XS 10_{pcs} **Foot**

PU-N°6112 PE-N°5249 Print

Collection of footholds.
Possible use for hands within the hardest routes.

XS 20_{pcs} **Foot**

Alien PU-N°6063 PE-N°5295

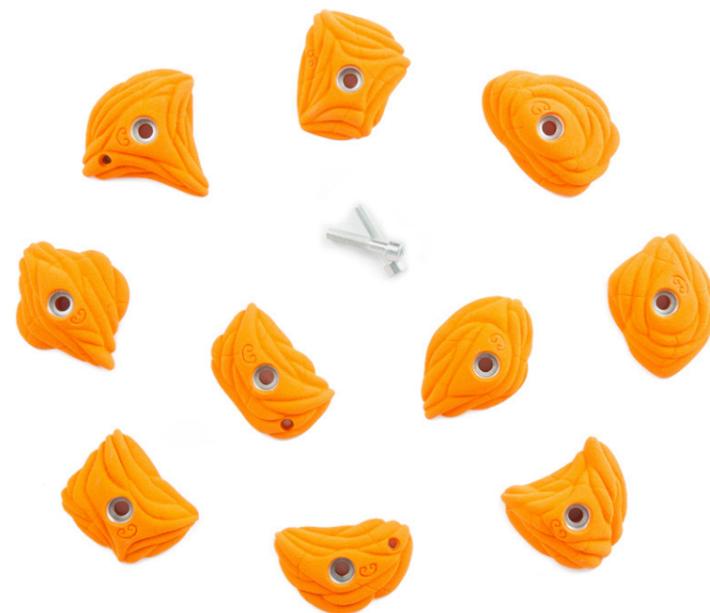

Basic set of small crimps,
ideal for your fingers workout and technique.

XS 15_{pcs} **Crimps**

PU-N°5248 Psycho

Assorted very elusive fine holds,
great for gripping and friction.

S 10_{pcs} **Slopers**

PU-N°5251 PE-N°8432 Unicorn

Long pinches for your fingerwork,
exceptional touching sensations.

S 5_{pcs} **Pinches**

Evo PU-N°6073 PE-N°5297

Collection of technical crimps and pinches.

S 15_{pcs} **Pinches**

Cristal PU-N°5936 PE-N°8077

Series of 10 models which will need friction precision. Accuracy will be tested to the limit!

S-M 10_{pcs} **Slopers**

PU-N°6072 PE-N°5367 **Osiris**

All-round holds with some pinches. Perfect for any style.

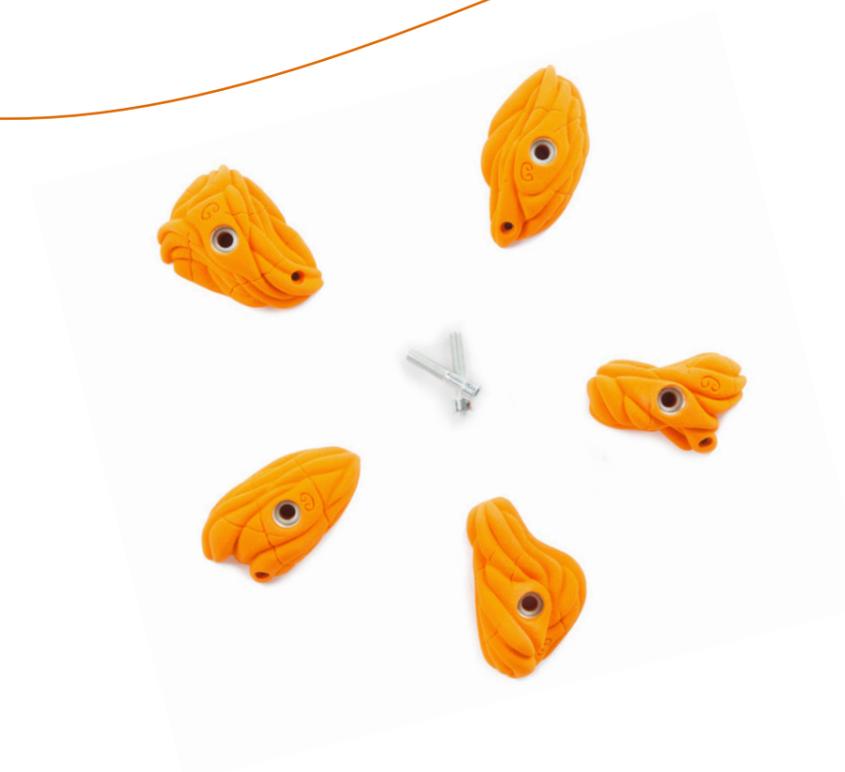

S 10_{pcs} **Mini-jugs**

PU-N°6214 PE-N°8264 **Magic**

Magnificent medium sized pinches! To be tamed...

M 5_{pcs} **Pinches**

Iron PE-N°5366 PU-N°7735

All-round series,
with some original shapes and crimps.

M 10_{pcs} Crimps

PE-N° 8011 PU-N°5368 Ride

Series of jugs for overhangs...
Particularly adapted for working technique.

L 10_{pcs} Jugs

Wolv PU-N°6344 PE-N°5296

Assorted grippy pocket holds and comfortable jugs.

L 10_{pcs} **pockets**

PU-N°6223 PE-N°8378 **Wave**

Here you have 10 slopers for all possible inclinations.

L 10_{pcs} **Slopers**

Velvet PU-N°6380 PE-N°5382

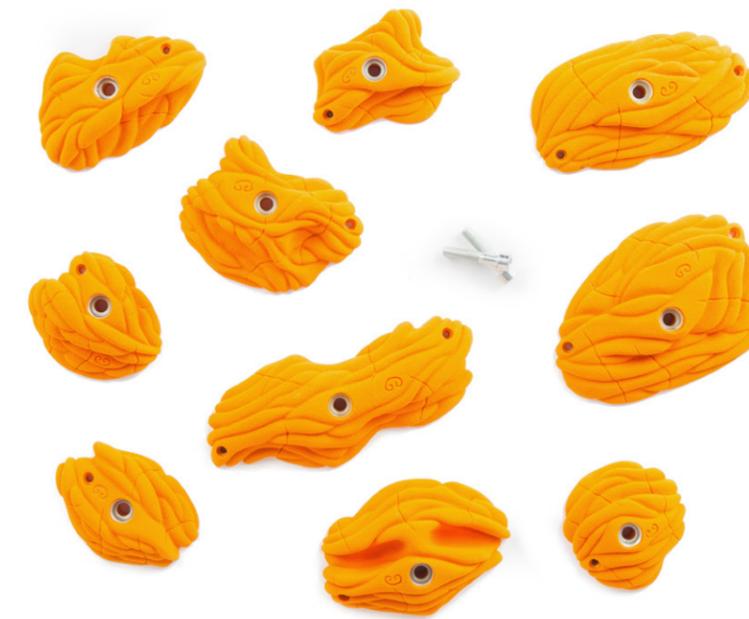

Pockets for two and three fingers, quite popular amongst climbers.

Mix 13_{pcs} **Pockets**

PU-N°6070 PE-N°5283 **Attack**

Serie of strips and subtle crimps, designed for vertical slightly slope profiles.

Mix 10_{pcs} **Crimps**

Efix PU-N°6068 PE-N°5298

Two tufas with multiple shapes and an eye-catching design.

L 2 pcs **Crimps**

Addic PU-N°6217 PE-N° 8079

A series specially sculpted for overhangs. With good ergonomics and comfort...

XL 5 pcs **Jugs**

PU-N°5463 PE-N°8120 **Maximus**

A set of very comfortable jugs, a must-have for indoor climbing.

XL 6 pcs **Jugs**

PU-N°6095 PE-N°5250 **Sismic**

An ideal serie of flat slopers with several type of prehensions

XL 3 pcs **Slopers**

Wild PU-N°6158 PE-N° 8263

Series of slopy pinches for a subtle and temperamental type of climbing.

XL 3_{pcs} **Slopers**

Drakkar PU-N°6267 PE-N°8460

A must, these pinches are destined for resistance or endurance routes.

XL 5_{pcs} **Pinches**

PU-N°6271 PE-N° 8283 **Blade**

These pair of slopers/pinches are a reference. Turn them as you will ! «Movement Spirit»

XL 2_{pcs} **Pinches**

PU-N°6303 **Astral**

Series of beautiful textured with a radical style!

XL 10_{pcs} **Slopers**

Nicolas FAVRESSE in Yosemite Valley 📷 Jean Louis WERTZ

Origin PU-N°7508 PE-N°8067

Delicately crafted holes and pinches!
Positive jugs for all profiles and levels.

XL 5 pcs **Pockets**

Bonzai PU-N°5377

Four quite radical style holds with some surprising pinches

XXL 4 pcs **Pinches**

Galaxy PU-N°6301

These big slopers and thin holds are exceptional! Specialty for bouldering.

XXL 3 pcs **Slopers**

PU-N°5364 Talisma

In the wake of the Bonzai serie, large pinches, perfect for vertical profiles and slopes.

XXL 3 pcs **Pinches**

PU-N°5379 Rambla

Designed to work on the spirit of movement, ideal for boulders.

G 2 pcs **Slopers**

Jurana PU-N°5365 PE-N°8314

Very beautiful carved tufa for a choice of varied and relatively pinchy grips.

G 2 pcs **Tufa**

Walhalla PU-N°5934

These 2 spicy items will offer a unique sensation for overhangs !
Designed with the purest "Karma» style !

G 2 pc **Jugs**

PU-N°5320 Solar

The centerpiece of our collection.
A Macro with incredible shapes
and a diversity of different grips.

G 1 pcs **Sloper**

Buddha PU-N°7506

Finding the right gripping on this volume will surprise you...
A hollow and very light volume.

XXL 1 pcs **Sloper**

Dragon PU-N°7510

Mega size crater!
Mildly positive and multi orientated inner gripping.
An essential model for all climbing levels!

XXL 1_{pcs} **Crater**

Spirit 1 PU-N°6052

All the spirit is united in this macro!
They will allow you to exceed your own limits
and will be a reference on your walls !

G 1_{pcs} **Tufa-slopers**

PU-N°7509 Bulldog

The essential pinch from our Karma series!
The longest in its category!

XXL 1_{pcs} **Pinches**

PU-N°6160 Spirit 2

On top of a significant lower weight for a same size,
the little sister of Spirit 1 has absolutely nothing to envy!

G 1_{pcs} **Tufa-pinches**

HYBRID

Nano PU-N°6184

Sculpted for the fingertips, these micro holds will require precision and leisure!

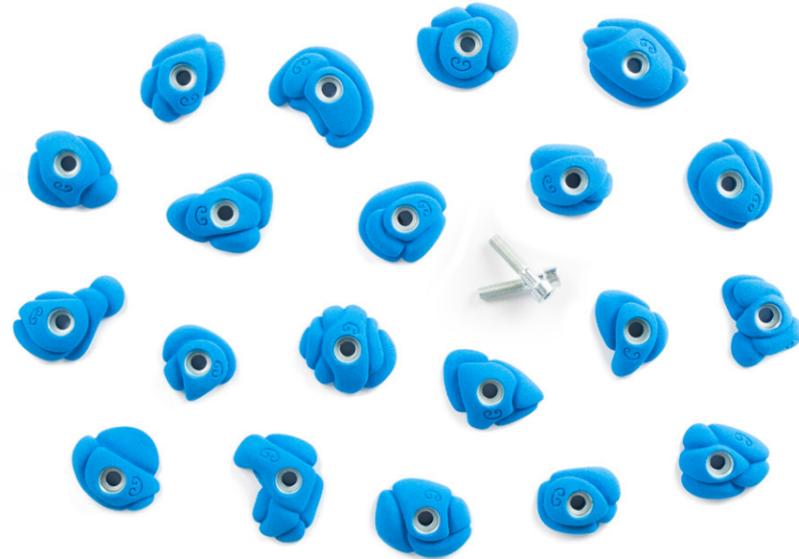

XXS 15_{pcs} **Edges**

PU-N°5253 Ramera

Highly technical series for feet and for pretty serious boulder passages. Not suited for hands.

XS 10_{pcs} **Foot**

Aku PU-N°61019 PE-N°5300

An essential series for feet, slim and all-around.

XS 20_{pcs} **Foot**

Mental PU-N°5938 PE-N°8389

An assortment of little pinches and technical crimpers with a "Hybrid" style.

S 20_{pcs} **Edges**

PU-N°6424 PE-N°6675 **Niake**

Small precision crimps. Varied profiles !

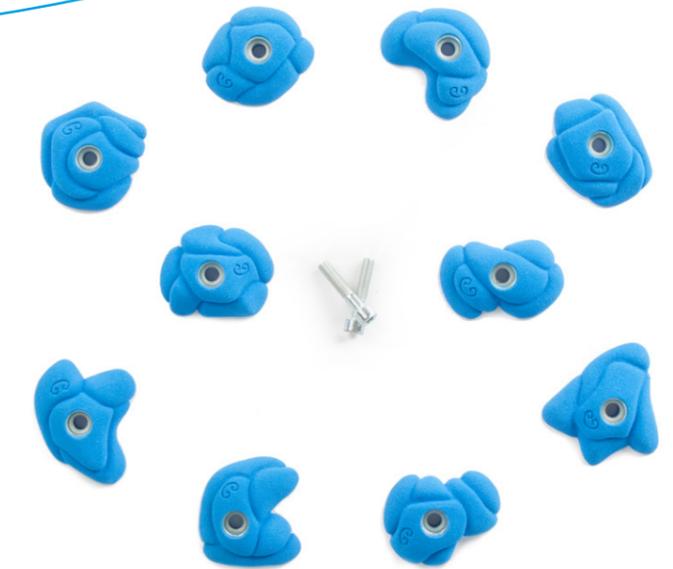

S 15_{pcs} **Edges**

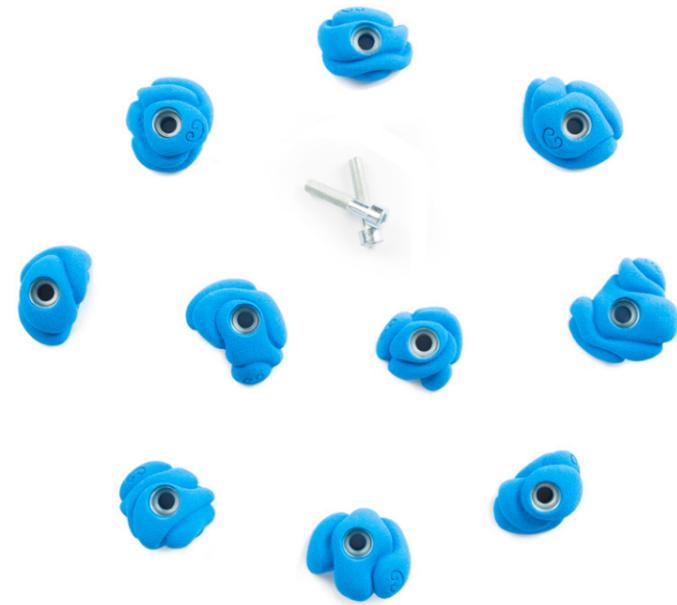

PU-N°6083 PE-N°8318 **Sendo**

Ultra technical series. Very slopy, for experts !

S 10_{pcs} **Edges**

Tao PU-N°6198 PE-N°8265

Big footholds for big overhangs.
Good for hooking and steep edging.

S 10_{pcs} **Edges**

Mutter PU-N°6079 PE-N°5257

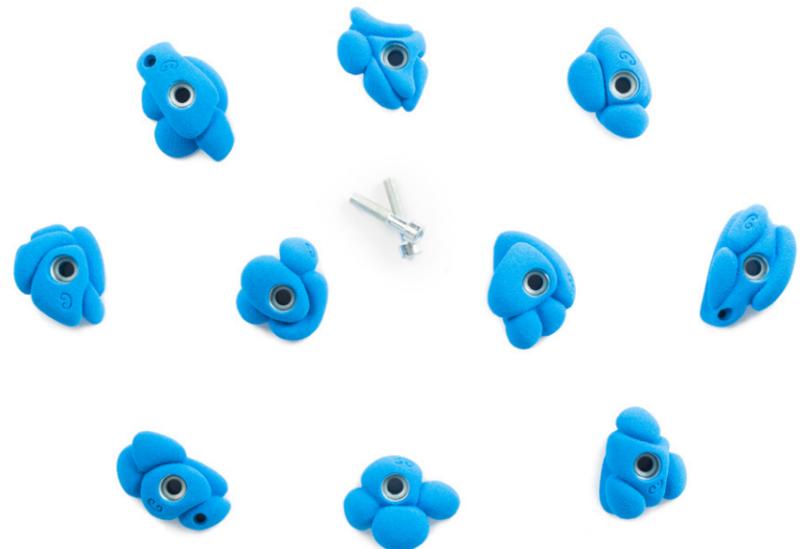

Set of small edges and pinches.
Excellent for perfecting your skills.

S 10_{pcs} **Edges**

PU-N°6064 PE-N°5246 **Tricky**

Mini jugs in the wake of the Mutter set
with a round grip and pinchy.

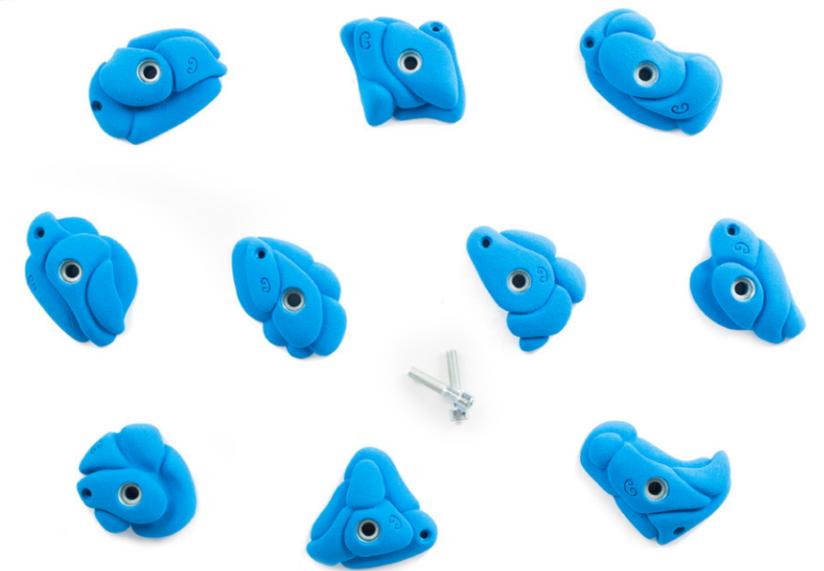

S 10_{pcs} **Mini-Jugs**

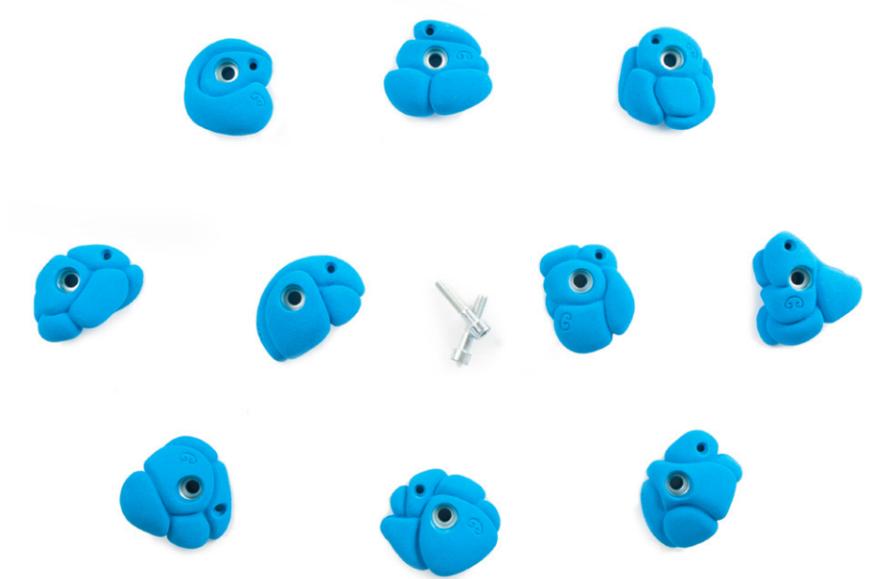

PU-N°6071 PE-N°5252 **Shia**

Work your fingers out with these ten
hard-and-fast arched holds.
For bouldering and resistance climbing.

M 10_{pcs} **Edges**

Yung PU-N°6403 PE-N°5243

Mini Jugs for all kind of routes.
Very appreciated by route setters.

M 10_{pcs} **Mini-jugs**

PU-N°6162 PE-N°8081 Festin

Edges which combine all types of shapes.

M 10_{pcs} **Edges**

Wasabi PU-N°7517 PE-N°8206

Medium size positive jugs (incl. comfortable mini jugs) to enliven your route setting. Perfect for continuous routes.

M 10_{pcs} **Jugs**

PU-N°6180 PE-N°5305 Mang

Flat mid-sized slopers and pinches. For fleeting grips on slabs and vertical routes.

L 10_{pcs} **Slopers-pinches**

Lotus PU-N°6221 PE-N°8371

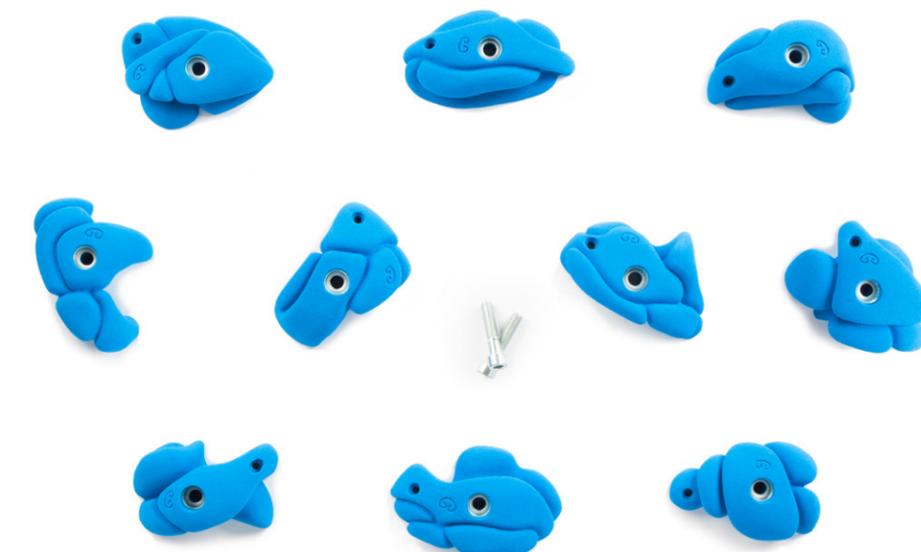

Corner holds, for imagining balance movements on arêtes and wooden volumes.

L 3_{pcs} **Slopers**

PU-N°6249 PE-N°8080 Nodo

Varied pinches and hooks for all overhangs!

L 10_{pcs} **Pinches**

IFSC Climbing Worldcup (L) - Puurs (BEL) 2015

Cosmos PU-N°6299 PE-N°8083

A collection of 10 jugs adapted for the steepest overhangs and roofs.

L 10 pcs **Jugs**

PU-N°5381 PE-N°8064 Dogma

Assorted technical and demanding pinches and edges. Sensations guaranteed for your finger.

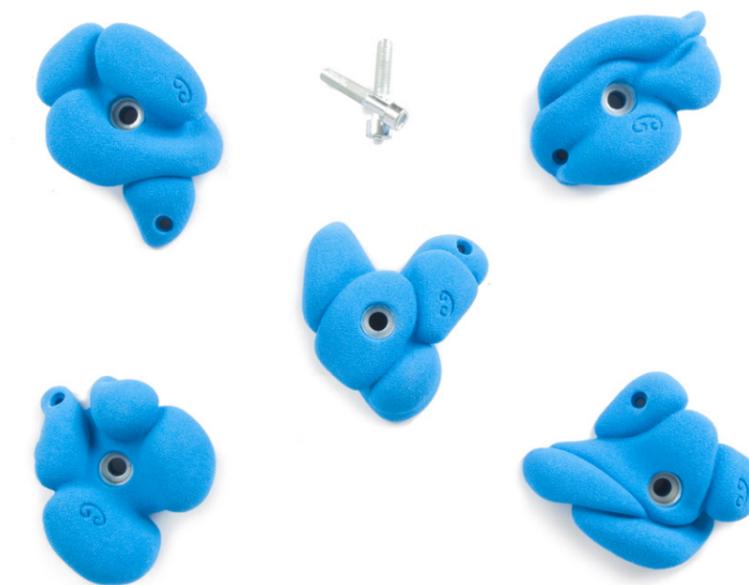

Mix 10 pcs **Pinches/Edges**

PU-N°6390 PE-N°5284 Woodoo

A set of comfortable, grippy and ergonomic holds.

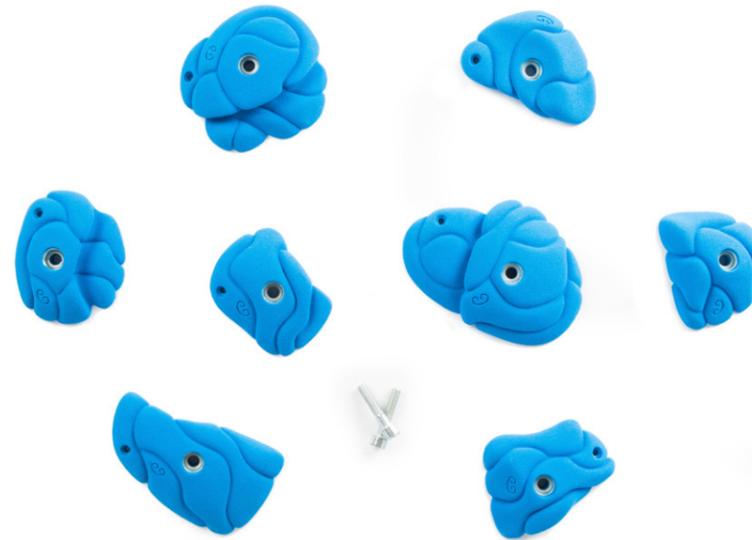

XL 5 pcs **Jugs**

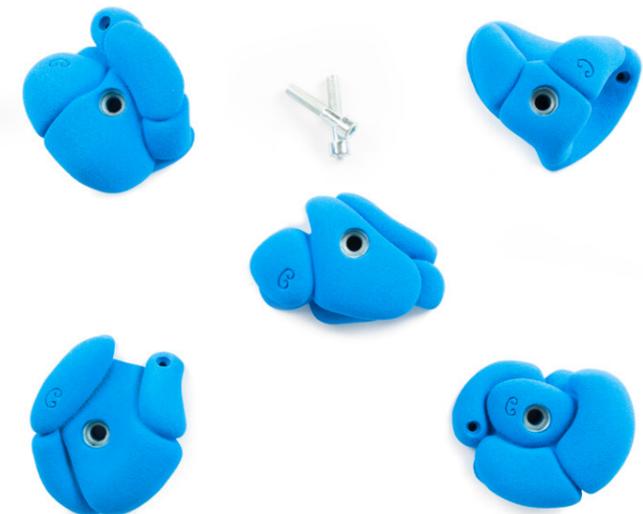

Scopp PU-N°6096 PE-N°5307

Perfect for working on your fingers strength, arched type edges.

L 8 pcs **Edges**

Tribal PU-N°6251 PE-N°8078

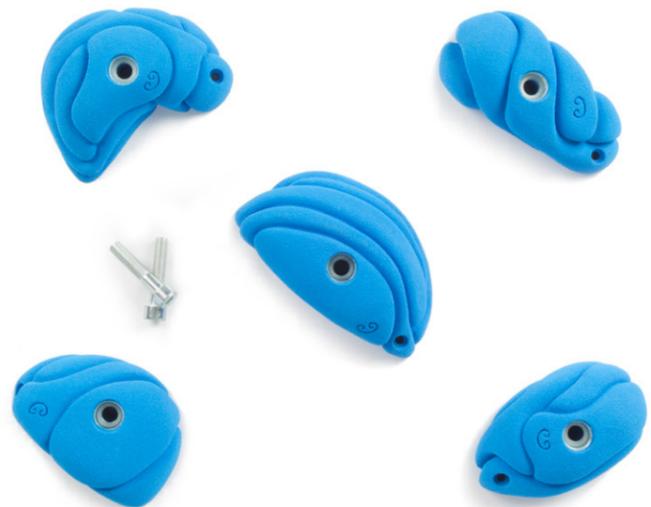

5 big graspy jugs with an ergonomic feel!

XL 5_{pcs} **Jugs**

Punja PU-N°6338 PE-N°5299

Large ergonomic pinches with multiple grasping angles. Ideal for medium to strong slopes. A classic for bouldering.

XL 5_{pcs} **Pinches**

Akro PU-N°6212 PE-N°8379

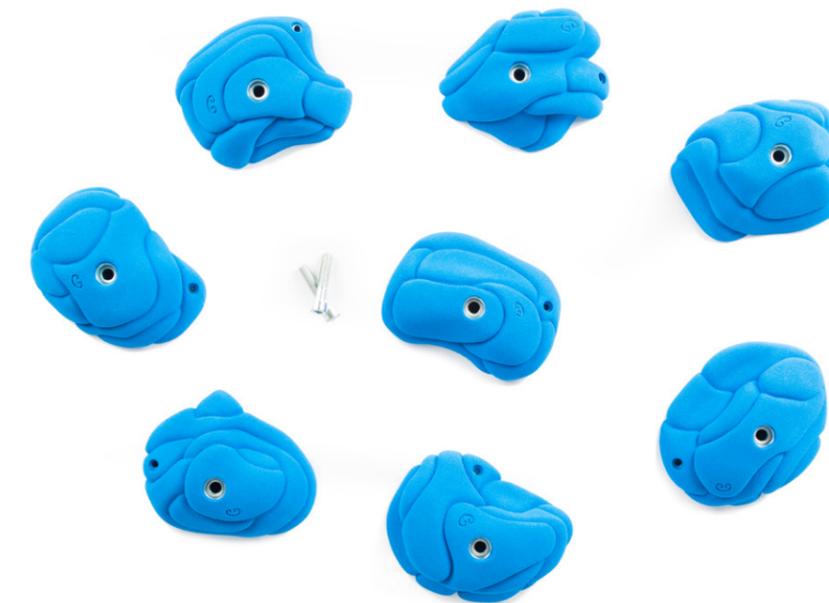

True jewels to be used with caution... and tact ! Offer multiple possibilities of pockets to work on...

Mix 10_{pcs} **Pockets**

PU-N°5370 PE-N°8672 **Chaos**

Six precisely and finely designed flat holds. Sensations guaranteed.

XXL 8_{pcs} **Slopers**

Mandala PU-N°7507

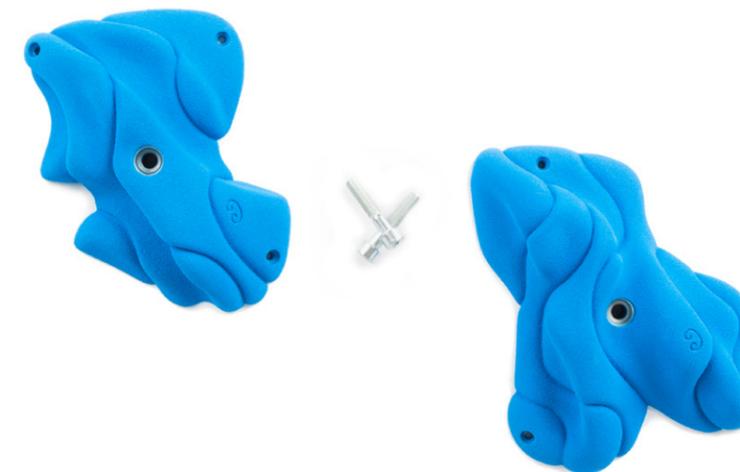

3 nicely technical and stylish mega size balls. Not for the faint-hearted!

G 3 pcs **Bowl**

PU-N°5369 Elipse

Essential flat holds for bouldering, featuring unique curves for precise and technical grasping.

XXL 2 pcs **Slopers**

Gecko PU-N°6440 PE-N° 8406

2 formidable and technical pinches for sensational climbing!

XXL 2 pcs **Pinches**

PU-N°6020 Dark

These 2 formidable and difficult to hold slopers are perfect for demanding boulder problems!

XXL 2 pcs **Slopers**

Golem PU-N°6021

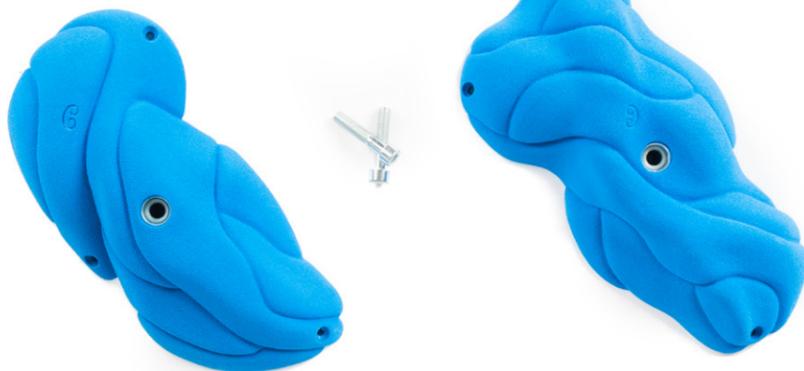

These 4 big "Hybrid" slopers will soon be a must!
Shaped with sleek and fluid lines for guaranteed fun climbing.

XXL 4_{pcs} **Slopers**

PU-N°5378 PE-N°8671 Mandarin

These huge jugs will soon be your best friend
in roofs and overhanging walls.

XXL 3_{pcs} **Slopers**

Dalton PU-N°5304 PE-N°8670

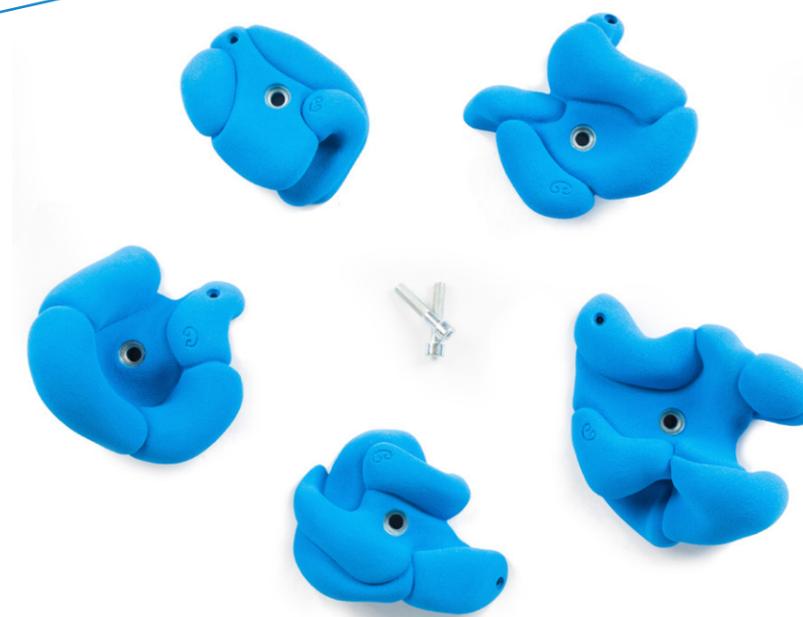

Long flat holds. Ideal for slabs and very technical slopes.
Multiple grabbing positions.

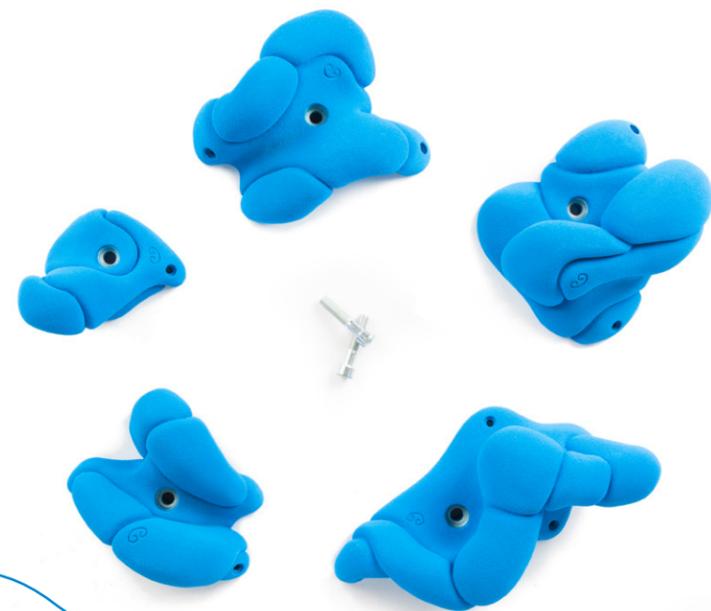

G 2_{pcs} **Slopers-pinches**

PU-N°5374 PE-N°8316 Pegasus

Very large jugs with lots of positive holds,
perfect for roof and slopes.

XXL 5_{pcs} **Jugs**

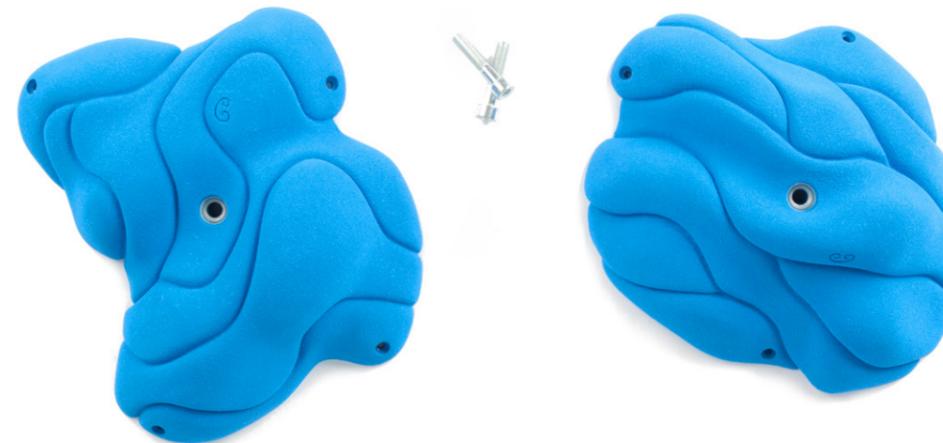

Olympus PU-N°5948 PE-N°8673

These huge jugs will soon be your best friend in roofs and overhanging walls.

XXL 5 pcs **Jugs**

Opium PU-N°6053

The biggest slopers of the «Hybrid»range, you could almost call it a volume. No matter what grade, sensations will be waiting for you!

G 2 pcs **Slopers**

PU-N°5380 Dagger

Large size slopers, a must-have for opening bouldering routes.

G 2 pcs **Slopers**

PU-N°6438 King

Big pinch for explosive bouldering movements!

G 2 pcs **Pinches**

TECHNOLOGY

While we are indeed passionate about movement and spirit, we also have at heart to constantly improve our products in order to meet our customers needs.

Our climbing holds are the result of cutting edge design and are manufactured with the latest technology so we can achieve the highest standards.

INSERT

CHC or FHC ? You don't have to choose anymore !

The Stainless Steel - UBI (Universal Bolt Insert) increases resistance up to 300% compared to traditional inserts, no matter what bolts you use.

All AGRIPP holds are now provided with this system. As the use of Impact Wrenches widespreads, the Stainless Steel - UBI provides you with much more resistance.

Your Agripp holds will as a result last much longer over time.

COMPOSIT

The new production line of PU Holds allows the hollowing of these. Resulting in holds five times lighter than conventional ones while maintaining an excellent resistance thanks to the PU features. This also makes it an economical product in terms of raw materials.

These techniques ensure that our composite holds are the lightest and most resistant ever made.

Our SURFACE HARDENING system makes the grain unique and high wear resistant over time for unmatched climbing sensations.

SAFETY HOLDS

AGRIPP has the latest «Safety Holds» technology and fulfills the latest European standards regarding these.

An excessive torque due to the tightening or the wall itself can sometimes damage a hold and eventually break it. The climbing walls being nowadays higher and higher, a piece or the entire hold itself can cause severe injuries to fellow climbers below. A one kilogram set falling from ten to fifteen meters can land with a force equivalent to several times its weight. A hold can thus turn into a deadly object for climbers if not designed properly.

This is why AGRIPP uses the latest « Safety Holds » technology that prevents a breaking hold from generating such debris.

The European Standard EN12572-3 ensures the effectiveness of this technology on safety.

MATERIAL

PE (polyester)

Made of plastic resin, it is still the most common hold you can find in European climbing walls.

A specific mixture of sand and pigment paste (mortar resin) is added to the plastic in order to produce a PE hold. The holds have a rocky touch with a unique grip feeling due to its hardness and texture.

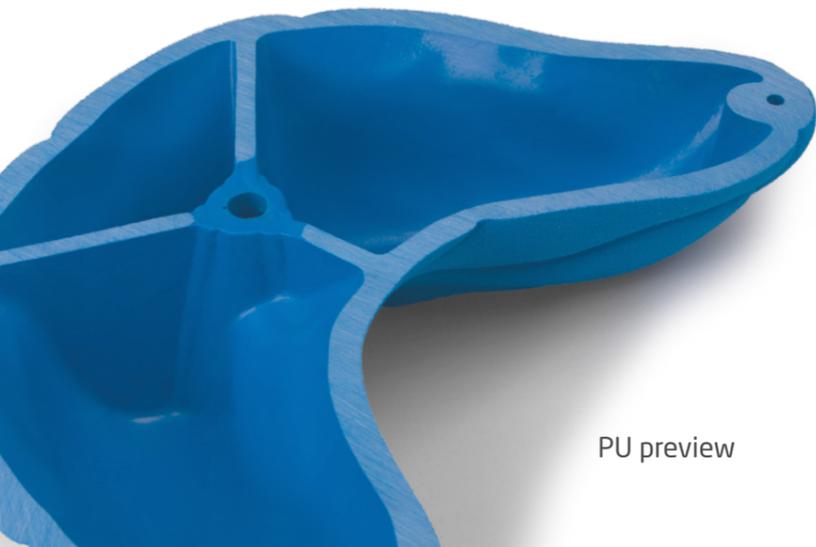

The PE resine is also cheaper.

PU (polyuréthane)

Currently the most resistant resin on the market, which has also been tested by a specialised consulting firm for years. The PU has almost become a standard amongst climbing walls.

PU is more flexible and absorbs the shocks and constrains of installation and dismantling far better. All this makes the PU holds long duration products.

Furthermore, we have opted for a new PU quality, the newest Dannolite formula. Our triple-sand layers give way to an unprecedentedly realistic texture; remarkably similar to PE.

PU preview

UNIVERSAL BOLT INSERT

The Universal Bolt Insert (UBI) is a revolutionary steel insert that allows the use of both countersunk and cap head bolts. The cylinder fits on the flat bottom of the insert; the cone lies on the slanted outer walls.

According to Finite Element Analysis models and ISO 130 strength tests performed by a laboratory, hold strength increases by up to as much as 300%.

By spreading the internal stresses in the hold more evenly around the bolt hole, the UBI technology decreases the pressure at the bottom and spreads it to the sides of the hold, making AGRIPP holds stronger than ever.

ECOLOGICAL COMPANY AND HOLDS

As manufacturers, but also as climbers, we feel particularly concerned by climate change and global warming.

We not only chose to work with the best professionals, we also want them to be as cautious as we are in terms of our ecological footprint. We make them use as few energy and raw materials as possible. As an example, carbon emissions are reduced by five thanks to the hollowing of the PU reduced holds.

At AGRIPP we abhor planned obsolescence and the exceptional life span of our holds will not only benefit our planet but also your wallet.

We want to contribute to the common effort in reducing our impact on nature and climate. By doing this we also want to preserve cliffs and mountains that are affected by increased erosion due to global warming and the acidification of runoff waters.
